

BHUSHAN KUMAR

SOFTWARE ENGINEER

Motivated Computer Science student specializing in Software Development (Full Stack, Mobile) and AI/ML Engineering, with deep technical expertise in Cybersecurity, DevOps, and scalable Infrastructure. Seeking a challenging professional role to leverage analytical skills, system architecture experience, and a commitment to high standards across diverse technical domains.

EDUCATION

B.Sc. Computer Science | Sukkur IBA University

Expected Aug 2026

Relevant Coursework: Operating Systems & Network Security, Databases & SQL, Software Engineering & DevOps Practices, AI/ML Fundamentals.

KEY PROJECTS & ARCHITECTURE

Database-Driven Event Management System

- Designed and developed a dynamic Event Management System focusing on robust database architecture and data handling.
- Implemented real-time content management for dynamic elements such as event image assets, dynamic pricing algorithms, and scheduling structures.

Agri-Rent Mobile Application (React Native)

- Developed a cross-platform mobile application using React Native to facilitate the renting and leasing of agricultural equipment.
- Implemented intuitive user interfaces, seamless navigation, and backend integration for real-time inventory and booking management.

Collaborative Doc-Editor (Full Stack)

- Engineered a web-based document editing platform featuring real-time text formatting and multi-user collaboration using Node.js and React.

Mithai-Shop E-Commerce Platform & Madhu-Project

- Mithai-Shop:** Built a responsive full-stack online store integrating dynamic product catalogs, secure RESTful APIs, and order processing.
- Madhu-Project:** Developed a tailored full-stack software application focusing on interactive UI components and optimized backend data handling.

BizTek Student IDE & MIPS Multiplayer Sudoku

- BizTek IDE:** Architected a LAN-isolated competitive programming platform with a sandboxed Docker backend for 50+ concurrent users.
- Sudoku:** Built a multiplayer 3x3 Sudoku game entirely in MIPS Assembly, bridged to browser clients via Node.js WebSockets and a Serveo SSH proxy.

PROFESSIONAL TRAINING

Remote Trainee | Excelerate

Feb 2026 — Present

- Participating in advanced remote training programs focusing on Prompt Engineering Research and Smart Automation.
- Collaborating to design and implement AI-driven workflow automations and data visualization projects.

CERTIFICATIONS & ACHIEVEMENTS

- MATLAB Onramp:** Data visualization, programming fundamentals, and stellar motion simulation.
- Docker Essentials & Kubernetes Fundamentals:** Containerization, orchestration, and deployment.
- CCNA:** Currently in progress (Networking concepts, routing, switching, security).

TECH SKILLS

- Languages:** Java, Python (AI/ML), JS, PHP, MIPS Assembly
- Mobile & Frontend:** React Native, React.js
- Backend:** Node.js (Express, WebSocket), Spring Boot, REST APIs
- DevOps:** Docker, Kubernetes, CI/CD, Serveo SSH, LAN/WAN
- Security:** Nmap, Metasploit, Wireshark, OWASP ZAP
- Tools:** Linux CLI, Git, MongoDB, MySQL
